Final Project — Grading Rubric

Week 13 demonstration · 30 points

Criterion	Excellent (Full)	Good (≈70–90%)	Developing (≈40–60%)	Insufficient (≤30%)	Max Pts
ER Diagram & Database Schema (6)	ERD has ≥5 entities, ≥3 relationships, correct PK/FK, schema matches demo	Minor normalization or key errors	ERD mismatches schema or fewer entities	Major design flaws, not implemented	6
CRUD Functionality (7)	All CRUD ops functional and error-free	Minor bugs in one op	Some ops missing or unstable	CRUD not functional	7
Access Control & Roles (4)	All 3 roles enforced: clear permission logic	2 roles or partial enforcement	Hardcoded checks or weak distinction	Missing access control	4
Security (4) (hashing optional)	Parameterized queries throughout + credentials not hardcoded + no DB details leaked in errors	Parameterized queries, with a minor gap (e.g., one hardcoded credential or one raw error shown)	Some queries built by string concatenation, or credentials hardcoded	No security	4
SQL Features (3)	Relevant trigger + SP shown live	One feature incomplete	Exists but unused	None implemented	3
UI & Navigation (3)	Smooth 2+ page UI	Functional but plain	Messy or complicated	Unusable	3
Professionalism (3)	Explain clearly	Minor confusion	Confused but has some understanding	No understanding	3
Total					30

Note on Security: password hashing is **optional** and is not needed for full marks. Teams that hash passwords (bcrypt recommended — see the Password Hashing handout) should explain it during the demo; it is not penalised if absent.
